

CONCRETE CAST UPLIGHTS INSTALLATION GUIDE

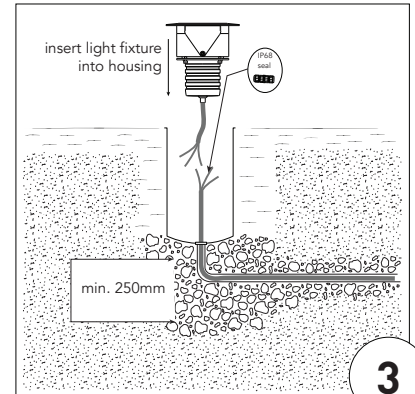

1

- STEP 1:**
- Create cut-out for housing as per installation instructions
 - Lay appropriate conduit for electrical connection to fixture
 - Allow for extra 250mm of pea-gravel for housing to rest on

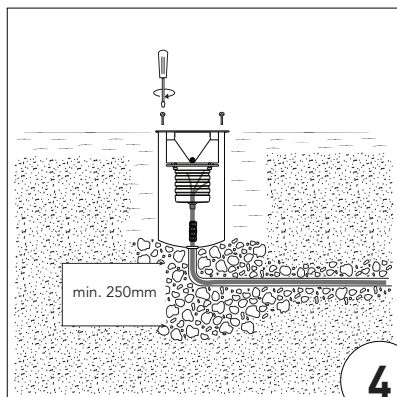

2

- STEP 2:**
- The concrete pour kit is placed in the bed before the concrete is poured.
 - When the concrete is dry, the in-ground fixture will fit easily in the space preserved by the pour kit.

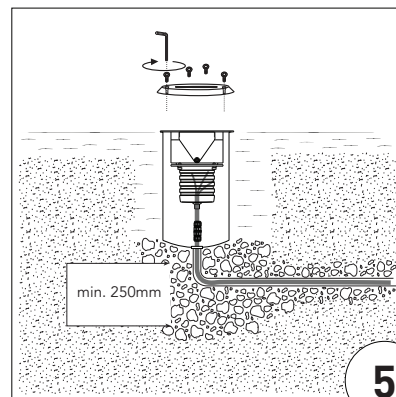

3

- STEP 3:**
- Connect light with IP68 seal junction box
 - Do not accumulate excess cable into the fixture

4

- STEP 4:**
- Ensure no debris enters the housing during installation
 - Screw fitting to housing or as per installation instructions
 - Ensure all steps are followed to ensure tight seal

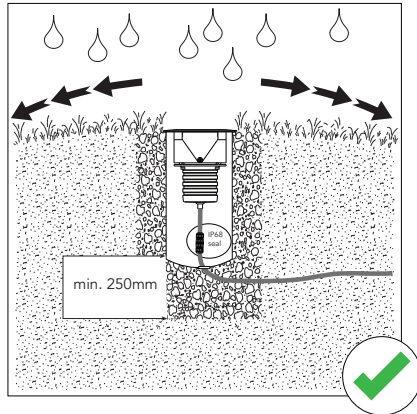

5

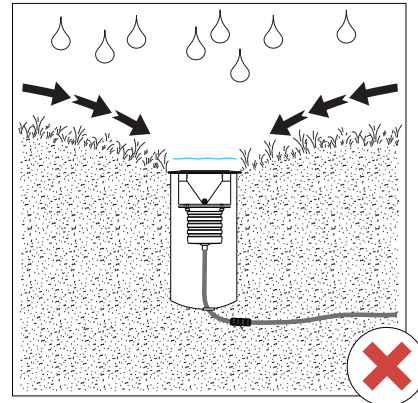

- STEP 5:**
- Fix top plate cover to the luminaire securely
 - Ensure all steps are followed, as per manufacturers instructions to ensure water-tight seal

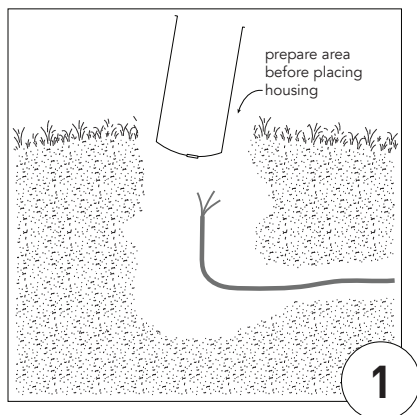

BURIED UPLIGHTS INSTALLATION GUIDE

FOR OPTIMAL DRAINAGE:
Install on slight mound to allow run-off
Place 250mm Pea-gravel below fitting for drainage

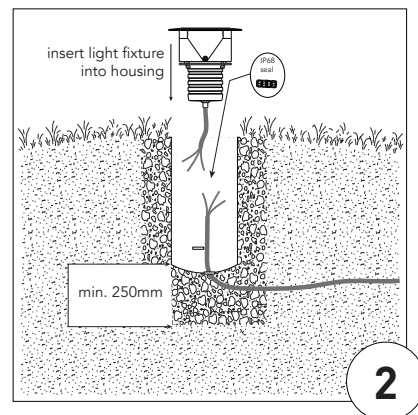

DO NOT:
Install in a recess where water flows toward or can pool at/around the light fitting

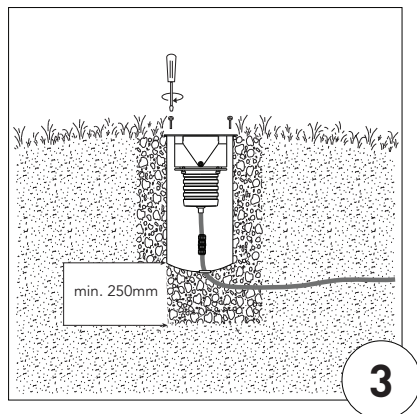

STEP 1:

- Create cut-out for housing as per installation instructions
- Lay appropriate conduit for electrical connection to fixture
- Allow for extra 250mm of pea-gravel for housing to rest on
- Surround housing with pea-gravel for optimal drainage
- Connect housing with external power cables

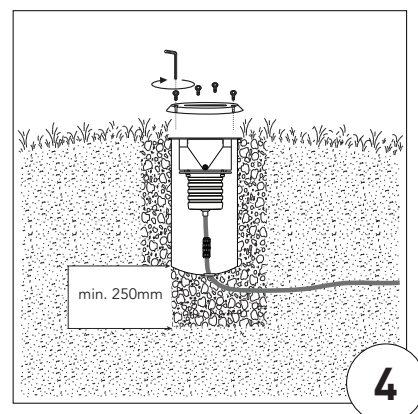

STEP 2:

- Connect light with IP68 seal junction box
- Do not accumulate excess cable into the fixture

STEP 3:

- Ensure no debris enters the housing during installation
- Screw fitting to housing or as per installation instructions
- Ensure all steps are followed to ensure tight seal

STEP 4:

- Fix top plate cover to the luminaire securely
- Ensure all steps are followed, as per manufacturers instructions to ensure water-tight seal
